

LYRICS: Call me 'The Sun'

Give me your attention just stop and listen,
I'm rising higher than the solar system
Call me Venus the goddess of love
cause I'm spreading world peace to all above

I'm back, Bigger faster stronger,
Planet Earth I will conquer.
No Universe too big for me
Own the powers combined of all the galaxies
Shoot across the Sky i'm number one
With my rays shinin brighter than the sun

I'll keep trying, keep striving toward the moon
And if i fail, I'll get back again soon
Mercury, Venus, Earth and Mars
If I fall, I'll end up on the stars

Bigger than Jupiter, More bling more rings than Saturn
Success can't come if you don't yearn, now it's my time yes it's my
turn,
Uranus, Neptune, Pluto
I may have a long way to go but,
Like an orbit I am back
Here I am, Ok ready attack
Big Bang, Bang Bang, Never Quit
Ha, better make a note of it.

Was that a shooting star nah?
Thats just me
Make a wish and count to 3
I got this you know me
I'm Hotter than Mercury
I'll be as big as I can be
Just watch just wait and see
I'm something heavenly

Some may say celestial
Or extraterrestrial
I'm just real, yeah thats ideal.
No pain no feel.
Don't block don't shield.

Like a meteor, Imma Take it all
Imma take it all and run
Call me 'The Sun'
